

## 2010 Main Event Race Report

This years new Psycle Workz Pro Stock Suzuki motorcycle sponsored by Maxima Racing Oils, made its debut at the 2<sup>nd</sup> round of the UEM / FIM European Drag Race Championship, at Santa Pod, U.K.

After a busy off season, fitting the new Suzuki motor and Hayabusa bodywork, we headed to the track.

The weather hindered qualifying on Saturday, but on Sunday we managed 2 shakedown passes which were looking good, and heading in the right direction. The settings were low and we played safe, getting used to the new engine and we qualified in a busy 16- bike field.

And with the track full of spectators, it was the perfect setting for its first outing on the track.

After some clutch changes we went out to our 1<sup>st</sup> round eliminations with some optimism, and ran another 2/10ths quicker than our previous run narrowly missing out on a 1<sup>st</sup> round win, against the current champion.

With the team buzzing on the race data and knowing we had plenty more to come, we head into our next round in Sweden.

Our thanks go to our sponsors:

Maxima Racing Oils

Harrison Brake Calipers

KLMN

Big CC Racing  
Atol Fuels  
Puma  
Psycle Workz Motorsport

And also to our crew, Chris, Gemma and Bart.
